

Bird Tangram

Tangram puzzles were invented by the Chinese thousands of years ago. In the 1800's, the game quickly spread throughout the world.

Each piece of the puzzle is called a *tan*. When the tans are put together into a recognizable design, the design is called a *tangram*.

The only two rules to making a tangram are: 1) all the pieces must be used in each design and 2) no piece may overlap another..

- 🍏 Cut out the pieces, lay them on the table, and move them around to make the walking duck shape.

- 🍏 Next, move the pieces around to make the swimming duck shape.
